Essentialube®

All-Purpose Cleaning Lubricant

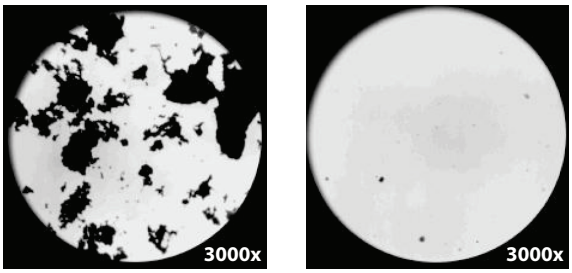
The Essential Tool for Performance and Reliability

There's a lot to get done around the farm, and Essentialube helps you get the job done. Essentialube is an all-purpose cleaning lubricant with a wide range of uses for agricultural equipment. Used as an engine and fuel treatment, it cleans away sludge and deposits while adding lubricity to the oil or fuel. It also solves many common performance issues such as smoking, rough idling and sluggish operation. It stabilizes fuel and oil over long periods and seasonal storage, and helps combat corrosion problems caused by water in ethanol fuel blends. Essentialube can also be used as a system cleaning flush or general oil treatment in transmissions, gearboxes, hydraulic systems, air compressors, and more, or as a powerful rust remover and general purpose lubricant.

ESSENTIAL TO

- **Restoring engine power and performance**
- **Removing sludge, gums, varnish and deposits**
- **Reducing smoking and oil consumption**
- **Stabilizing fuel and oil**
- **Dispersing moisture and preventing corrosion**
- **Rust removal and prevention**
- **General purpose lubrication and cleaning**

ESSENTIALUBE DISSOLVES AND DISPERSES FUEL AND OIL DEPOSITS



Fuel and lubricant breakdown leaves behind deposits which can lead to abrasive wear, sticking and advanced degradation of new fluid. Essentialube dissolves and disperses these deposits for a truly complete oil change.

Application	Problem	Solution	Benefit
Engine Flushing (all types)	• Existing sludge & deposits • Smoking • Oil consumption • Sluggish performance	Add 2 to 4 ounces of Essentialube per quart of oil used in engine. Operate normally up to 1 week prior to changing oil.	• Keeps engine clean • Maximizes life of new engine oil • Deglazes piston rings & seals • Improves engine performance
Transmission Flushing (Manual & Automatic)	• Existing sludge & deposits • Hard shifts • Shift hesitation	Add 2 ounces of Essentialube per quart of used fluid in transmission. Operate normally up to 1 week prior to changing transmission fluid.	• Keeps transmission clean • Maximizes life of new fluid • Frees sticking servo-valves
Fuel System (Diesel & Gasoline)	• Gums & deposits • Poor combustion • Ethanol-water separation	Add 1 ounce of Essentialube per gallon of diesel or gasoline fuel for fuel system cleanup. Add 1/2 ounce of Essentialube per gallon of diesel or gasoline fuel for continuous use.	• Keeps fuel system clean • Improves combustion • Improves performance • Disperses moisture
Engine Oil & Transmission Fluid Supplement	• Sludge & deposit formation • Loss of performance	Add 2 ounces of Essentialube per quart of lubricating oil	• Prevents sludge & deposits • Maintains equipment performance • Extends oil life
Seasonal Storage	• Rust & corrosion buildup • Fuel degradation • Oil degradation • Condensation	Add 2 ounces of Essentialube per gallon of fuel capacity and fill tank with fuel. Add 2 ounces of Essentialube per quart of engine oil. Run engine at idle for 5 to 10 minutes prior to placing in storage.	• Prevents rust & corrosion • Extends oil life • Stabilizes fuel • Disperses moisture
