

FRACTASTIC HD

Frac Pump Packing Lube

Description:

FRACTASTIC HD is formulated to provide superior protection of frac pumps in severe frac service conditions. It is formulated from a proprietary blend of highly refined mineral oils, VI improvers, and is compounded with select additives for excellent anti-wear, anti-oxidation, corrosion inhibition, extreme pressure, and friction reduction properties. The design will protect rod and packing materials including steel, brass, Kevlar, rubber, graphite, Teflon, and etc.

Applications:

- Use in frac pumps to protect rod and packing materials

Features:

- Thermally stable - Minimal degradation, Long service life
- High film strength - Exceptional EP performance protects against premature failure
- Advanced water separation -Excellent antifoam and demulsibility characteristics
- Rust and corrosion inhibited -Non-corrosive to yellow metals
- Protects rod and packing materials including steel, brass, Kevlar, rubber, graphite, Teflon, and etc.
- Excellent anti-wear properties
- Superior anti-oxidation properties
- Very Tacky to reduce splatter

Typical Properties:

- AppearanceBlue Liquid
- Viscosity Index191
- Pour Point, °C-24
- Flash Point, °C226
- Specific Gravity.....0.853
