COFFING JLC ELECTRIC CHAIN HOIST

September 23, 2021

To ensure all hook-suspended JLC electric chain hoists can be used with the newly launched HTP/HTG trolleys, we made a minor change to the hook suspension profile. The part numbers for the new hook suspensions are as follows:

- Part# 192089711 latch-type, powder-coat hook replaces Part# 3M405A01S
- Part# 192089712 latch-type, zinc-plated hook replaces Part# 3M405A01ZS

Part# 192089711 is now being furnished as the standard hook suspension on all JLC electric chain hoists with capacities of 1/8 –1/2 tons. 1- and 2-ton capacities will continue to use Part# 3M405A01S until all inventory is exhausted and then convert to Part# 192089711. The change to the hook suspension is modeled in the overlay image below. The transparent model depicts the old profile.
